

PROFESSIONAL SUMMARY:

Motivated **Computer Science graduate** and passionate **Software Developer** with hands-on experience designing and building scalable, user-focused web and software applications. Skilled in **Java, Python, JavaScript, and React**, with a strong foundation in **software design, API integration, and cloud-ready development**. Experienced working in Agile environments, collaborating across cross-functional teams, and solving complex problems with creativity and precision. Eager to contribute to Bell's mission of innovation and digital excellence through continuous learning, teamwork, and technical growth.

TECHNICAL SKILLS

Languages :	Java, JavaScript (ES6+), TypeScript, Python, C#, SQL, HTML, CSS
Frameworks & Tools:	React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap
Databases :	MongoDB, PostgreSQL, Redis
Cloud & DevOps:	AWS (basic), Docker (familiar), Git, CI/CD, Agile, Jira
Concepts:	RESTful APIs, Authentication, Data Management, AI Integration, Software Testing
Soft Skills:	Team Leadership, Analytical Thinking, Adaptability & Learning, Collaboration, Excellent Communication, Problem-Solving

PROFESSIONAL EXPERIENCE:

Web Developer / IT Support

Chawla's Cuisine

Jan 2025 – Present

- Provided first-line support for POS systems, internal networks, and domain/email issues
- Delivered hands-on troubleshooting of software bugs, connectivity problems, and hardware malfunctions
- Maintained and updated website content, menus, and seasonal promotions
- Integrated and monitored analytics tools (GA & FB Pixel) to track digital performance
- Ensured data security, timely backups, and system availability for restaurant operations

Full-Stack Developer – Freelance/Projects

Remote

Sep 2023 – Present

- Developed scalable web apps with TypeScript and Next.js
- Created user-friendly interfaces and frontend pipelines to connect with APIs
- Integrated user authentication (Google Auth) and rate-limiting for chatbot systems
- Worked independently using Agile tools (Jira, Git), writing testable, maintainable code
- Emphasized accessibility, responsiveness, and consent-aware design in all UIs

Floor Manager

Nam's Hakka

Jan 2023 – Aug 2023

- Led a 15-member front-of-house team, ensuring smooth service and a superior dining experience.
- Trained and mentored staff, boosting efficiency and customer satisfaction.
- Acted as a liaison between kitchen and service teams, streamlining communication.
- Managed on-the-spot problem-solving and coordinated entertainment/events.
- Recognized as "Employee of the Month" for outstanding leadership.

PROJECTS

Web Development Projects

Personal Portfolio Website

- **Technologies:** HTML, CSS, JavaScript, Bootstrap
- **Description:** Designed and developed a personal portfolio website to showcase projects and skills, emphasizing responsive design and user-friendly navigation.

E-commerce Website

- **Technologies:** HTML, CSS, JavaScript, Bootstrap
- **Description:** Collaborated with a team to create an e-commerce website for a class project. Focused on front-end development and enhancing user experience through intuitive design.

Customer Support Chatbot Using Next.js and OpenAI

- **Technologies:** Next.js, OpenAI's ChatGPT, Upstash Redis, TypeScript
- **Description:** Developed an intelligent customer support chatbot that delivers real-time, natural language interactions using OpenAI's ChatGPT. The chatbot provides users with instant, streamed responses, ensuring a smooth and efficient communication experience. Integrated Upstash to implement rate-limited API routes, maintaining security and performance by protecting against misuse. The application features optimistic UI updates to create a more responsive and user-friendly interface, while robust error handling guarantees reliable operation. Built with TypeScript, the project emphasizes code reliability and scalability, demonstrating the practical application of advanced AI in customer service.

Real-Time Chat Application Using Next.js 13

- **Technologies:** Next.js 13, React, TailwindCSS, Upstash Redis, TypeScript, Google Authentication
- **Description:** Implemented a real-time chat application designed for optimal performance and user experience. Utilized Upstash Redis to enable instant messaging, ensuring high-performance data retrieval and seamless communication between users. The application featured a comprehensive friendship system for managing friend requests and integrated Google Authentication to secure user access. Leveraged TypeScript to enhance code reliability and maintainability. By refining the user interface with React and TailwindCSS, the app achieved a modern, responsive design. This project highlights a sophisticated approach to real-time messaging, emphasizing speed, security, and usability.

Netflix Clone App - Full-Stack MERN Application

- **Technologies:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS
- **Description:** Developed a full-stack Netflix clone using MERN stack. The app features secure JWT-based authentication, seamless movie and TV show streaming via external API integration, and a responsive UI optimized for mobile and desktop. Key features include an advanced search function for content discovery, video trailer playback, similar content recommendations, and a personalized search history. Designed a sleek landing page with an intuitive UI/UX. This project demonstrates expertise in full-stack development, API integration, and responsive design.

EDUCATION

Bachelor of Computer Science - Software Engineering

ALGOMA UNIVERSITY

2023-2025

- Recipient of President's Award
- Recipient of Algoma University Achievement Award

High School Science Stream

Amarsingh Secondary School

2017-2019

- Recipient of the Merit Scholarships
